Subject: Report#: PED-COM-13-2018

Becki Moellgaard and myself would like to present at Council on June 19/18 regarding our application for the above numbered report.

Why we want to present:

To be able to explain the rationale for wanting a rubberized surface for the track

What we will talk about:

We will talk about the reasons why we have developed this project and the positive effects on the body physically while using a rubberized surface vs asphalt surface.

Thank you in advance for allowing us to do this presentation.

Becki and Terri
