

Haldimand County Farm Sizes

To determine the mean and average farm sizes in Haldimand County, the following methodology was used:

Using Haldimand County's GIS data, all parcels of land that were located outside of a settlement boundary or partially within a settlement boundary were selected. Of these parcels, only parcels of 4 hectares in area or greater were selected – making a general assumption that properties that are smaller than 4 hectares are likely to be considered rural residential lots, rather than active farms.

This query returned 3896 parcels of land. The average parcel was 29.45 ha (72.77 acres) and the median parcel of the returned information was 23.95 hectares (59.18 acres).

63 Pyle Road is 28.49 hectares (70.4 acres) which is approximately the size of the average Haldimand County farm.
