
HALDIMAND COUNTY

Memorandum ENG-M02-2022 Consolidated Stop Control By-law 2022 For Consideration by Council on September 26, 2022

To: Mayor Hewitt and Members of Council
From: Kris Franklin, Manager, Engineering Services

The Highway Traffic Act authorizes municipalities to prescribe by-laws for regulatory signage on roadways under its jurisdiction.

Since 2001, Haldimand County has passed a number of by-laws creating stop conditions at intersections across the County. Due to the current number of individual stop control by-laws, it is becoming harder to track the actual by-law that regulates the stop conditions at any given intersection.

In order to address this, staff have created a consolidated Stop Control By-law that lists all the stop conditions on roads within the County and under Haldimand County jurisdiction. This ensures all stop controls, as of this date, are included in one consolidated by-law. The consolidated Stop Control By-law is included in the agenda.

The removals of the stop conditions on East Edinburgh Square at Sutherland Street East and West Edinburgh Square at Caithness Street East presented at the September 20, 2022 Council in Committee meeting through Report ENG-11-2022 Edinburgh Square - Caledonia - Conversion to One Way Roads are included in this consolidation.

No other changes to the existing stop control locations are being proposed through this consolidated by-law.
